Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MU	424.62	949.28	652.21	1089.29	Falling	Bearish Crossover	Bearish	Hold	Position is highly profitable relative to the 424.62 entry cost. However, a poor Risk/Reward ratio of 1:0.47 and a Bearish MACD Crossover combined with falling OBV indicate that momentum is breaking down. Protect capital and do not add exposure.
NVDA	220.80	208.64	204.33	236.54	Falling	Bearish Territory	Bearish	Sell	Trading below the entry cost of 220.80. While the Risk/Reward ratio is mathematically favorable at 1:6.47, the negative momentum (MACD in Bearish Territory) and lack of volume validation (Falling OBV) suggest a high probability of testing the 204.33 support level. Exit to preserve capital.
ORCL	183.72	211.82	178.80	250.25	Falling	Bullish Territory	Bearish	Hold	Price is well above the 183.72 entry. MACD remains in Bullish Territory, but a recent sharp pullback and falling OBV indicate institutional distribution. Risk/Reward (1:1.16) does not favor new buys. Maintain current holding with a trailing stop.
SNDK	1418.17	1642.00	1277.33	1861.00	Falling	Bearish Territory	Bearish	Hold	Currently holding gains above the 1418.17 entry. However, MACD has slipped into Bearish Territory alongside falling OBV. Coupled with a poor Risk/Reward of 1:0.60, further upside is constrained. Hold but tighten risk parameters.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MSFT	455.37	411.74	400.88	466.32	Falling	Bearish Territory	Bearish	Sell	Trading significantly below the 455.37 entry cost. MACD is in Bearish Territory and OBV is falling heavily, signaling strong distribution. Despite a favorable Risk/Reward ratio of 1:5.03 near the 400.88 support, the structural breakdown warrants cutting losses.
TSM	424.30	426.80	385.06	450.16	Falling	Bearish Crossover	Bearish	Hold	Trading virtually flat against the 424.30 entry cost. A Bearish MACD Crossover and falling OBV suggest immediate downward pressure. Risk/Reward is highly unfavorable at 1:0.56. Hold with a tight stop-loss just below 1-Month Support (385.06).
LLY	971.12	1149.15	943.26	1182.73	Rising	Bullish Territory	Bullish	Hold	Strong performance above the 971.12 entry cost with supportive rising OBV and MACD in Bullish Territory. However, the stock is trading immediately underneath its 1-Month Resistance ceiling (1182.73), yielding an asymmetric and poor Risk/Reward of 1:0.16. Do not buy; hold existing shares to harvest gains.
LRCX	305.41	324.45	263.71	346.19	Falling	Bearish Crossover	Bearish	Hold	Retaining a modest buffer over the 305.41 entry cost. Momentum is declining as evidenced by a Bearish MACD Crossover and falling OBV. Given the poor 1:0.36 Risk/Reward ratio, do not average up.

Daily Market Report - Watchlist Technical Summary

Generated automatically on 2026-06-10 14:52:28 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
NOW	107.68	114.19	85.44	139.20	Falling	Bullish Territory	Sideways	Hold	Trading above the 107.68 entry. MACD is currently in Bullish Territory, but a falling OBV suggests a lack of buying pressure on recent rallies. With a mediocre Risk/Reward of 1:0.87, new positions are not recommended.
AMD	448.37	490.33	393.36	546.44	Falling	Bearish Territory	Bearish	Hold	Comfortably above the 448.37 entry, but technicals are deteriorating. MACD has entered Bearish Territory, OBV is falling, and the Risk/Reward ratio is poor at 1:0.58. Lock in partial profits or hold with a protected stop.
CACI	524.53	519.14	465.00	545.29	Falling	Bullish Territory	Sideways	Hold	Trading slightly below the 524.53 entry cost. Although MACD is in Bullish Territory, falling OBV indicates distribution. A poor Risk/Reward ratio of 1:0.48, driven by its proximity to the 545.29 resistance ceiling, precludes any additional buy orders.
AVGO	446.13	396.60	385.59	495.00	Falling	Bearish Territory	Bearish	Hold	Position is underwater relative to the 446.13 entry. While Risk/Reward is highly attractive mathematically at 1:8.94 near key support of 385.59, MACD is in Bearish Territory and OBV is falling. Hold only with a strict stop-loss set just below 385.59.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
ANET	171.11	156.40	135.13	177.48	Falling	Bullish Territory	Bearish	Hold	Trading below the 171.11 entry. While MACD remains in Bullish Territory, the recent trend is bearish and OBV is falling. Given a balanced Risk/Reward of 1:0.99, hold existing positions but wait for volume validation before adding.
