WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-11 13:57:04 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
ADVANC.BK	370.62	360.00	349.00	372.00	Falling	Bullish Crossover	Sideways	Hold	The position is currently underwater at 360.00 THB, but structural support at 349.00 THB remains intact. The MACD has registered a Bullish Crossover (0.81 vs. Signal 0.80), suggesting a technical recovery floor is firming up. We maintain a Hold to allow the reversal to develop, setting a strict defensive stop-loss if 349.00 THB breaks.
AOT.BK	55.00	56.50	52.00	59.00	Falling	Bullish Territory	Bullish	Sell	Although the position is profitable at 56.50 THB, the OBV trend is Falling (188.68M), indicating severe volume-price divergence and distribution. Under active risk rules, a falling OBV on a profitable position triggers an automatic downgrade to Sell to lock in gains before a correction toward the 52.00 THB support floor.
BBL.BK	168.45	169.00	163.00	176.00	Falling	Bearish Territory	Bearish	Sell	With a thin profit margin at 169.00 THB vs. a 168.45 THB cost, the technical setup is highly defensive. MACD is in Bearish Territory (1.30 vs. Signal 1.93) and OBV is Falling. We downgrade to Sell to protect capital and prevent the position from turning unprofitable as price risks breaking key support at 163.00 THB.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-11 13:57:04 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
GULF.BK	57.92	64.25	59.00	68.50	Falling	Bearish Crossover	Bearish	Sell	A highly profitable position at 64.25 THB that must be closed immediately to lock in gains. The MACD has registered a Bearish Crossover (1.41 vs. Signal 1.43) and OBV is Falling, indicating momentum has exhausted near the 68.50 THB resistance. We execute a trailing Take-Profit Sell.
PRM.BK	8.70	8.20	7.95	9.05	Falling	Bearish Territory	Bearish	Hold	The position is unprofitable at 8.20 THB. However, the price has stabilized slightly above the key 1-month structural support floor of 7.95 THB (recent bounce from 8.05 THB). We maintain a highly defensive Hold to observe if this floor firms up, but will execute a defensive Sell immediately upon a clean break of 7.95 THB.
KTB.BK	32.53	34.75	33.00	35.75	Falling	Bearish Territory	Bearish	Sell	The position is profitable at 34.75 THB, but distribution is evident as OBV is Falling and MACD resides in Bearish Territory (0.33 vs. Signal 0.40). In accordance with trailing risk guidelines, we downgrade to Sell to secure open profits and avoid holding through a deeper test of the 33.00 THB support.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-11 13:57:04 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
PTT.BK	32.12	36.50	36.00	37.25	Falling	Bearish Territory	Sideways	Sell	While currently showing solid gains at 36.50 THB, the underlying technicals are deteriorating with OBV Falling and MACD in Bearish Territory (0.15 vs. Signal 0.23). To manage active risk and protect open capital from mean-reverting downward toward the 36.00 THB support floor, we downgrade to Sell.
SCB.BK	143.38	137.50	131.00	141.50	Falling	Bullish Territory	Sideways	Hold	The position is unprofitable at 137.50 THB, but a technical recovery floor is firming up well above the 131.00 THB support level (stabilizing at 137.50 THB after hitting 134.00 THB). MACD remains in Bullish Territory (0.87 vs. Signal 0.53), justifying a tactical Hold to allow the bullish momentum to challenge 141.50 THB.
WHA.BK	4.87	5.05	4.52	5.20	Rising	Bearish Territory	Sideways	Sell	The position is profitable at 5.05 THB, and while OBV is Rising, MACD has dipped into Bearish Territory (0.11 vs. Signal 0.13), indicating a momentum breakdown. Because the criteria for holding a profitable stock (both Bullish MACD and Rising OBV) are violated, we proactively downgrade to Sell to lock in gains.
