Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
ADVANC.BK	370.62	354.00	349.00	372.00	Rising	Bearish Crossover	Bearish	Hold	Position is currently underwater relative to the entry cost of 370.62 THB, which was executed near the 1-month resistance of 372.00 THB. Rising OBV shows accumulation, but a bearish MACD crossover suggests downward momentum is still active. Hold to see if the 349.00 THB support level holds.
AOT.BK	55.00	56.50	51.25	59.00	Falling	Bullish Territory	Sideways	Hold	Currently trading at 56.50 THB, which is in profit against the 55.00 THB entry cost. However, the Risk/Reward ratio is highly unfavorable at 1:0.48 as price sits close to the 59.00 THB resistance. Falling OBV warns of a volume-price divergence despite MACD remaining in bullish territory.
BBL.BK	168.45	169.00	163.00	176.00	Falling	Bearish Territory	Bearish	Hold	Trading marginally above the entry cost of 168.45 THB at 169.00 THB. With OBV falling and MACD sitting in bearish territory, selling pressure is dominant. Monitor the 163.00 THB support level closely to prevent the trade from slipping into a loss.
GULF.BK	57.92	63.00	58.50	68.50	Falling	Bullish Territory	Sideways	Hold	Maintains a healthy cushion above the 57.92 THB entry cost. Although MACD is positive and in bullish territory, falling OBV reveals a lack of buying commitment on recent sessions. Avoid adding to positions due to mediocre Risk/Reward parameters (1:1.22).

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
PRM.BK	8.70	8.20	7.95	9.05	Falling	Bearish Territory	Bearish	Hold	Underwater relative to the 8.70 THB entry cost. The technical backdrop is negative, characterized by falling OBV and a MACD stuck in bearish territory. A defense of the 7.95 THB 1-month support is critical; a breach below this level should trigger defensive action.
KTB.BK	32.53	34.50	32.75	35.75	Falling	Bearish Crossover	Sideways	Hold	In a profitable position compared to the 32.53 THB entry cost. However, a poor Risk/Reward ratio of 1:0.71 and a bearish MACD crossover indicate waning momentum. Falling OBV signals distribution as the price consolidates beneath the 35.75 THB resistance.
PTT.BK	32.12	36.25	36.00	37.25	Falling	Bearish Territory	Sideways	Hold	Well above the 32.12 THB entry cost. However, the latest close of 36.25 THB sits immediately above the 1-month support of 36.00 THB. With falling OBV and MACD in bearish territory, a breakdown of this support looks likely, and capital preservation should be prioritized.
SCB.BK	143.38	137.50	130.50	141.50	Falling	Bullish Territory	Sideways	Hold	The entry cost of 143.38 THB lies above the current price of 137.50 THB and the 1-month resistance ceiling of 141.50 THB, resulting in an unfavorable 1:0.57 Risk/Reward ratio. Falling OBV indicates institutional selling despite the MACD residing in bullish territory. Look to reduce exposure on counter-trend rallies.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
WHA.BK	4.87	5.00	4.44	5.20	Rising	Bearish Territory	Sideways	Hold	Position is slightly positive relative to the 4.87 THB cost. However, an extremely poor Risk/Reward ratio of 1:0.36 is present as price hovers near the 5.20 THB resistance. Rising OBV is a positive sign, but the bearish MACD state warrants holding rather than expanding the position.
