Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MU	424.62	949.28	652.21	1089.29	Falling	Bearish Crossover	Bearish	Hold	While significantly above the entry cost of 424.62, the stock is experiencing distribution as indicated by falling OBV and a bearish MACD crossover. Coupled with a poor Risk/Reward ratio of 1:0.47, capital preservation is key; do not add to positions, and consider trailing stops near 860.
NVDA	220.80	208.64	204.33	236.26	Falling	Bearish Territory	Bearish	Hold	Currently trading below the entry cost of 220.80. Although the Risk/Reward ratio is highly favorable at 1:6.41 due to the close proximity to 1-Month Support (204.33), momentum is firmly bearish with falling OBV. Hold the position with a strict stop loss just below 204.33.
ORCL	183.72	211.82	178.8	250.25	Falling	Bullish Territory	Sideways	Hold	The stock remains in a profitable position relative to the 183.72 entry. MACD remains in bullish territory, but falling OBV indicates institutional distribution on the recent pullback from the 248 high. R/R is mediocre at 1:1.16; hold and protect gains with a stop above 190.
SNDK	1418.17	1642.0	1277.33	1861.0	Falling	Bearish Territory	Bearish	Hold	Secured in profitable territory relative to the 1418.17 entry. However, MACD momentum has rolled into bearish territory and OBV is falling, indicating active selling. With a poor Risk/Reward ratio of 1:0.60, hold the position but aggressively lock in profits if support at 1550 fails.

Daily Market Report - Watchlist Technical Summary

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MSFT	455.37	411.74	400.01	466.32	Falling	Bearish Territory	Bearish	Hold	Trading significantly below the entry cost of 455.37. The mathematical Risk/Reward profile is strong at 1:4.65, but the stock is in a clear downtrend with bearish MACD and negative OBV. Do not average down; hold with a critical stop-loss line at the 400.01 support level.
TSM	424.30	426.8	385.06	450.16	Falling	Bearish Crossover	Bearish	Hold	Consolidating flat against the entry cost of 424.30. A bearish MACD crossover combined with falling OBV signals distribution. The Risk/Reward ratio is weak at 1:0.56; maintain a strict break-even stop to protect your capital from further downside.
LLY	971.12	1149.15	941.64	1182.73	Rising	Bullish Territory	Bullish	Hold	Despite a highly bullish MACD and supportive rising OBV, the stock is trading immediately underneath its 1-Month Resistance ceiling (1182.73), resulting in a terrible Risk/Reward ratio of 1:0.16. To protect capital, do not buy here; hold existing shares with a tight trailing stop.
LRCX	305.41	324.45	263.71	346.19	Falling	Bearish Territory	Bearish	Hold	Slightly above the entry cost of 305.41. With a bearish MACD and falling OBV, technical pressure is mounting. The poor Risk/Reward ratio of 1:0.36 dictates avoiding new purchases. Hold the position but protect the entry level with a stop-loss at 303.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
NOW	107.68	114.19	85.44	139.2	Falling	Bullish Territory	Sideways	Hold	Currently trading above the 107.68 entry cost. MACD is in bullish territory, but falling OBV warns of a lack of institutional buying pressure. Given the mediocre Risk/Reward ratio of 1:0.87, avoid adding shares and maintain a trailing stop near the entry cost.
AMD	448.37	490.33	393.36	546.44	Falling	Bearish Territory	Bearish	Hold	Position remains green relative to the 448.37 entry, but momentum is fading as MACD is in bearish territory and OBV is falling. Given a poor Risk/Reward ratio of 1:0.58, do not accumulate more. Hold and set a trailing stop-loss to lock in profits.
CACI	524.53	519.14	465.0	545.29	Falling	Bullish Territory	Sideways	Hold	Trading slightly below the entry cost of 524.53. Although MACD is in bullish territory, falling OBV indicates a lack of buy-side conviction. The poor Risk/Reward ratio of 1:0.48 suggests a defensive stance; hold with a strict stop-loss below the 465 support level.
AVGO	446.13	396.6	385.59	495.0	Falling	Bearish Territory	Bearish	Hold	Trading significantly below the entry cost of 446.13, but currently resting immediately above key 1-Month Support (385.59), which yields a favorable 1:8.94 R/R ratio. Given the bearish MACD and falling OBV, do not add. Hold, but execute a hard stop if 385.59 is broken.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
ANET	171.11	156.4	135.13	177.48	Falling	Bullish Territory	Sideways	Hold	Trading below the entry cost of 171.11. Although the MACD is in bullish territory, the recent price trend has softened and OBV is falling, indicating lack of volume support. With a Risk/Reward ratio of 1:0.99, hold the position but maintain a stop-loss near the 135.13 support level.
