Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MU	424.62	949.28	652.21	1089.29	Falling	Bearish Crossover	Bearish	Hold	Position remains highly profitable compared to the 424.62 entry cost. However, the poor Risk/Reward ratio of 1:0.47 and falling OBV combined with a bearish MACD crossover indicate short-term weakness, making new buy positions highly unfavorable.
NVDA	220.80	208.64	204.33	236.54	Falling	Bearish Territory	Bearish	Sell	Trading below the entry cost of 220.80 with a falling OBV and a MACD stuck in Bearish Territory. Although the calculated Risk/Reward is a theoretically favorable 1:6.47, the lack of buying volume and negative momentum warrant capital protection.
ORCL	183.72	211.82	178.80	250.25	Falling	Bullish Territory	Bearish	Hold	Comfortably above the entry cost of 183.72. However, the trend is shifting downward as evidenced by falling OBV. The MACD is still in Bullish Territory but losing momentum. Avoid new purchases due to a mediocre 1:1.16 Risk/Reward ratio.
SNDK	1418.17	1642.00	1277.33	1861.00	Falling	Bearish Territory	Bearish	Hold	Trading well above the entry cost of 1418.17. While the current position is secure, the structural Risk/Reward ratio is a poor 1:0.60 as the price approaches resistance. Falling OBV and MACD in Bearish Territory advise against adding further exposure.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MSFT	455.37	411.74	400.88	466.32	Falling	Bearish Territory	Bearish	Sell	Trading significantly below the entry cost of 455.37. Falling OBV and a MACD in Bearish Territory confirm strong selling pressure. Despite a structural Risk/Reward of 1:5.03 near the 400.88 support, exiting to prevent further capital degradation is recommended.
TSM	424.30	426.80	385.06	450.16	Falling	Bearish Crossover	Bearish	Sell	Price is hovering immediately at the entry cost of 424.30. A poor Risk/Reward ratio of 1:0.56, falling OBV, and a fresh bearish MACD crossover suggest that the support level of 385.06 is likely to be tested. Cut the position to protect capital.
LLY	971.12	1149.15	943.26	1182.73	Rising	Bullish Territory	Bullish	Hold	Strong bullish trend supported by rising OBV and a MACD in Bullish Territory. However, with the stock trading immediately underneath its 1-Month Resistance ceiling, the Risk/Reward is a highly unfavorable 1:0.16. Hold existing positions from the 971.12 entry but absolutely do not buy here.
LRCX	305.41	324.45	263.71	346.19	Falling	Bearish Crossover	Bearish	Hold	Currently holding gains above the 305.41 entry cost. However, the technical posture is deteriorating with a bearish MACD crossover, falling OBV, and a poor Risk/Reward profile of 1:0.36 near the 346.19 ceiling. Maintain a strict trailing stop.

Daily Market Report - Watchlist Technical Summary

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
NOW	107.68	114.19	85.44	139.20	Falling	Bullish Territory	Bearish	Hold	Position remains green relative to the 107.68 entry cost. MACD is still in Bullish Territory, but falling OBV and a recent price correction suggest fading buying pressure. A Risk/Reward profile of 1:0.87 does not justify adding new capital.
AMD	448.37	490.33	393.36	546.44	Falling	Bearish Territory	Bearish	Hold	Sustaining unrealized gains from the 448.37 entry. Momentum is heavily bearish with a falling OBV and MACD in Bearish Territory. The unappealing Risk/Reward ratio of 1:0.58 dictates holding existing shares rather than purchasing more.
CACI	524.53	519.14	465.00	545.29	Falling	Bullish Territory	Sideways	Sell	Trading slightly below the entry cost of 524.53. Although MACD is in Bullish Territory, the falling OBV and immediate overhead resistance result in a poor Risk/Reward ratio of 1:0.48. Recommend selling to protect capital.
AVGO	446.13	396.60	385.59	495.00	Falling	Bearish Territory	Bearish	Sell	Trading significantly below the entry cost of 446.13. Despite an excellent structural Risk/Reward of 1:8.94 near the 385.59 support, the falling OBV and strong bearish MACD momentum indicate that the support line is vulnerable. Cut losses.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
ANET	171.11	156.40	135.13	177.48	Falling	Bullish Territory	Bearish	Sell	Position is currently at a loss relative to the 171.11 entry cost. While MACD is in Bullish Territory, the trend is pointing downward, confirmed by falling OBV. The mediocre Risk/Reward of 1:0.99 suggests exiting the position before further downside occurs.
