WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-15 12:13:53 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
ADVANC.BK	370.62	361.00	349.00	372.00	Rising	Bullish Territory	Bullish	Hold	Risk/Reward is moderate at 1:0.92. A TDEX Bullish regime provides supportive domestic liquidity, allowing us to hold this high-quality defensive asset for recovery.
AOT.BK	55.0	59.25	52.00	60.00	Rising	Bullish Territory	Bullish	Hold	Risk/Reward is poor at 1:0.10 near resistance. However, a TDEX Bullish regime and strong rising institutional volume justify holding to capture momentum.
BBL.BK	168.45	174.00	164.00	176.00	Rising	Bearish Territory	Sideways	Sell	Poor Risk/Reward of 1:0.20 and MACD Bearish crossover signal structural exhaustion. Despite a Bullish TDEX regime, capital preservation rules dictate a profit-taking Sell.
GULF.BK	57.92	64.75	59.50	68.50	Falling	Bearish Territory	Bearish	Sell	With a Risk/Reward of 1:0.71, Falling OBV and Bearish MACD warn of institutional distribution. TDEX Bullish regime cannot override technical breakdown; Sell to lock in gains.
PRM.BK	8.7	8.40	7.95	8.95	Rising	Bearish Territory	Sideways	Hold	Risk/Reward is 1:1.22. Not at an asymmetric buying floor yet. Under a Bullish TDEX regime, we hold this underwater position as rising OBV signals accumulation.
KTB.BK	32.53	36.00	34.00	36.00	Rising	Bullish Crossover	Bullish	Hold	Risk/Reward is Poor (At Resistance). TDEX Bullish market regime and active MACD Bullish Crossover encourage holding the position to let profits run.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-15 12:13:53 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
PTT.BK	32.12	35.50	35.25	37.25	Falling	Bearish Territory	Bearish	Sell	Despite an excellent Risk/Reward of 1:7.00 near support, falling OBV and a bearish MACD trigger trailing exit rules. Sell to preserve capital despite TDEX Bullish regime.
SCB.BK	143.38	140.50	133.00	141.50	Rising	Bullish Territory	Bullish	Hold	Risk/Reward is unfavorable at 1:0.13. TDEX Bullish regime supports rising volume trend, making it prudent to Hold for a breakeven exit rather than buying more.
WHA.BK	4.87	5.05	4.60	5.20	Rising	Bearish Territory	Sideways	Sell	Risk/Reward of 1:0.33 is poor. Bearish MACD crossover signals loss of momentum. TDEX Bullish regime does not justify ignoring structural decay; Sell to lock in profits.
