Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MU	424.62	935.89	652.21	1089.29	Falling	Bearish Territory	Bearish	Hold	Position is deeply in profit relative to the entry cost of 424.62. However, with a poor Risk/Reward ratio of 1:0.54, falling OBV, and MACD in bearish territory, new purchases should be avoided. Hold to protect gains.
NVDA	220.80	208.19	199.34	236.26	Falling	Bearish Territory	Bearish	Hold	Currently trading below the entry cost of 220.80. Although the Risk/Reward profile is highly favorable at 1:3.17, the falling OBV and bearish MACD indicate persistent downward momentum. Hold with a strict stop near support at 199.34.
ORCL	183.72	205.81	178.80	250.25	Falling	Bearish Crossover	Bearish	Hold	Trading above the entry cost of 183.72. The technical picture is deteriorating with a recent bearish MACD crossover and falling OBV, though the Risk/Reward of 1:1.65 remains moderate. Hold current position but do not add.
SNDK	1418.17	1646.54	1277.33	1861.00	Rising	Bearish Territory	Sideways	Hold	Comfortably above the entry cost of 1418.17. Rising OBV shows healthy volume, but momentum is lagging with MACD in Bearish Territory. The poor Risk/Reward of 1:0.58 discourages new buying at current levels.
MSFT	455.37	403.41	398.48	466.32	Falling	Bearish Territory	Bearish	Hold	Position is underwater relative to the entry cost of 455.37. While Risk/Reward looks highly attractive at 1:12.76 near the 398.48 support, the falling OBV and bearish MACD warrant extreme caution. Hold only if support holds.

Daily Market Report - Watchlist Technical Summary

Generated automatically on 2026-06-10 07:23:52 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
TSM	424.30	427.92	385.06	450.16	Rising	Bearish Territory	Sideways	Hold	Trading close to the entry cost of 424.30. Despite positive volume validation from a rising OBV, the poor Risk/Reward of 1:0.52 and bearish MACD suggest limited immediate upside.
LLY	971.12	1144.68	941.64	1182.73	Rising	Bullish Territory	Bullish	Hold	Significantly above the 971.12 entry cost. Although OBV is rising and MACD is bullish, the stock is trading immediately under its 1-Month Resistance of 1182.73, yielding an extremely poor Risk/Reward of 1:0.19. Protect capital and do not add here.
LRCX	305.41	327.16	263.71	349.09	Rising	Bearish Territory	Sideways	Hold	Position is in profit from the 305.41 entry. Rising OBV validates underlying volume support, but the bearish MACD and poor Risk/Reward ratio of 1:0.35 suggest limited near-term upside. Hold.
NOW	107.68	106.97	85.44	139.20	Falling	Bearish Crossover	Bearish	Hold	Slightly below the entry cost of 107.68. A bearish MACD crossover and falling OBV indicate declining momentum and volume, offsetting the moderate 1:1.50 Risk/Reward ratio. Hold and monitor support at 85.44.
AMD	448.37	475.51	393.36	546.44	Falling	Bearish Territory	Bearish	Hold	Position is in profit relative to the 448.37 entry cost. However, a falling OBV and bearish MACD indicate weak momentum. Combined with a subpar Risk/Reward of 1:0.86, further upside is currently restricted.

Generated automatically on 2026-06-10 07:23:52 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
CACI	524.53	525.04	465.00	545.29	Falling	Bullish Territory	Sideways	Hold	Trading right at the entry cost of 524.53. Although MACD is in bullish territory, the falling OBV and highly unfavorable Risk/Reward ratio of 1:0.34 (due to proximity to 545.29 resistance) make new buys unwise.
AVGO	446.13	392.16	370.33	495.00	Falling	Bearish Territory	Bearish	Hold	Trading below the entry cost of 446.13. Risk/Reward is highly attractive at 1:4.71 near the 370.33 support, but falling OBV and bearish MACD indicate there is no technical validation of a bottom. Hold.
ANET	171.11	152.16	135.13	177.48	Falling	Bearish Crossover	Bearish	Hold	Position is underwater compared to the entry cost of 171.11. The bearish MACD crossover and falling OBV reflect high distribution. Maintain a Hold but watch the key 135.13 support closely.
