

EXECUTIVE MARKET REPORT

Watchlist Portfolio Technical & Momentum Summary

Generated: 2026-06-10 10:16:41 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD Status	Trend	Rec.	Technical Commentary
MU	\$424.62	\$935.89	\$652.21	\$1089.29	Falling	96.68 (Signal: 104.36, Bearish)	Bearish	HOLD	Risk/Reward of 1:0.54 falls far below the 1:1.50 minimum threshold, making new buy positions strictly forbidden.
NVDA	\$220.80	\$208.19	\$199.34	\$236.26	Falling	0.98 (Signal: 3.18, Bearish)	Bearish	BUY	A highly favorable 1:3.17 Risk/Reward ratio near key support at 199.34 justifies a BUY entry below the cost basis of 220.80.
ORCL	\$183.72	\$205.81	\$178.80	\$250.25	Falling	11.24 (Signal: 12.24, Bearish)	Bearish	BUY	Risk/Reward ratio of 1:1.65 meets the minimum criteria, permitting a selective BUY despite falling OBV and bearish momentum.
SNDK	\$1418.17	\$1646.54	\$1277.33	\$1861.00	Rising	131.24 (Signal: 149.1, Bearish)	Bearish	HOLD	Despite rising OBV, a restrictive Risk/Reward ratio of 1:0.58 prevents any new BUY executions.
MSFT	\$455.37	\$403.41	\$398.48	\$466.32	Falling	2.09 (Signal: 5.22, Bearish)	Bearish	BUY	An extraordinary 1:12.76 Risk/Reward ratio near major support of 398.48 presents a highly asymmetric BUY setup relative to the 455.37 entry level.
TSM	\$424.30	\$427.92	\$385.06	\$450.16	Rising	10.83 (Signal: 11.41, Sideways)	Sideways	HOLD	Risk/Reward ratio of 1:0.52 triggers a strict lock against buying, forcing a HOLD despite constructive rising OBV volume.
LLY	\$971.12	\$1144.68	\$941.64	\$1182.73	Rising	45.32 (Signal: 39.85, Bullish)	Bullish	HOLD	Strongly bullish MACD is overridden by a highly unfavorable Risk/Reward ratio of 1:0.19 near resistance, mandating a HOLD.
LRCX	\$305.41	\$327.16	\$263.71	\$349.09	Rising	14.74 (Signal: 15.33, Sideways)	Sideways	HOLD	The 1:0.35 Risk/Reward structure falls critically short of our 1:1.50 requirement, strictly prohibiting buy actions.
NOW	\$107.68	\$106.97	\$85.44	\$139.20	Falling	5.25 (Signal: 5.32, Bearish)	Bearish	BUY	Risk/Reward ratio sits precisely at the 1:1.50 limit, justifying a BUY opportunity as price tests areas near the 107.68 entry cost.
AMD	\$448.37	\$475.51	\$393.36	\$546.44	Falling	35.88 (Signal: 44.09, Bearish)	Bearish	HOLD	With a Risk/Reward ratio of 1:0.86, we remain on hold as the asset currently lacks sufficient margin of safety.
CACI	\$524.53	\$525.04	\$465.00	\$545.29	Falling	3.21 (Signal: -0.42, Bullish)	Bullish	HOLD	Bullish MACD is neutralized by a poor 1:0.34 Risk/Reward ratio close to resistance, making BUY action strictly illegal under our risk rules.
AVGO	\$446.13	\$392.16	\$370.33	\$495.00	Falling	2.07 (Signal: 9.06, Bearish)	Bearish	BUY	An asymmetric Risk/Reward profile of 1:4.71 near support makes this a highly compelling BUY, offering protection relative to the original entry.
ANET	\$171.11	\$152.16	\$135.13	\$177.48	Falling	2.18 (Signal: 2.34, Bearish)	Bearish	HOLD	At 1:1.49 Risk/Reward, the setup marginally misses the 1:1.50 threshold, requiring a HOLD to preserve strict risk discipline.
