WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-07-31 15:24:24 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
ADVANC.BK	376.97	380.00	368.00	387.00	Rising	Bearish Territory	Sideways	Take-Profit Exit	Position profitable (+0.82%), but OBV Rising cannot overcome Bearish MACD territory with negative crossover signal (3.15 vs 3.83). Poor R/R of 1:0.58 at resistance ceiling (380.00 vs 387.00). Lock profits given technical exhaustion risk.
AOT.BK	61.76	63.75	60.50	65.00	Falling	Bearish Territory	Sideways	Take-Profit Exit	Profitable (+3.22%), but Falling OBV contradicts accumulation thesis; MACD in Bearish Territory (0.79 vs 1.03 signal). Poor R/R of 1:0.38 near resistance. Exit to secure modest gains before momentum deteriorates further.
KBANK.BK	231.39	243.00	227.00	246.00	Rising	Bearish Territory	Bullish	Hold	Strong +4.99% profit with Rising OBV accumulation, but MACD remains in Bearish Territory (6.87 vs 7.00 signal). Very poor R/R of 1:0.19 near resistance ceiling (243.00 vs 246.00). Hold to monitor for MACD crossover confirmation; avoid fresh accumulation at resistance.
GULF.BK	67.46	66.75	61.25	68.50	Rising	Bullish Crossover	Bullish	Hold (Accumulate)	Loss position (-1.05%) but Rising OBV with fresh Bullish Crossover (0.90 vs 0.88) signals early accumulation phase. Price well above 1Mo Support (66.75 vs 61.25). Risk/Reward acceptable at 1:0.32. Core momentum setup justifies holding through early recovery retest.
IVL.BK	23.61	22.10	21.70	25.75	Falling	Bearish Territory	Bearish	Support-Aware Stop-Loss	Underwater -6.39% with Falling OBV and Bearish MACD (0.07 vs 0.33 signal). Price near 1Mo Support floor (22.10 vs 21.70). High-Conviction Bounce R/R label insufficient to offset deteriorating technicals. Stop loss required to prevent further structural weakness.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-07-31 15:24:25 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
PTTGC.BK	36.17	36.75	33.50	41.75	Falling	Bearish Crossover	Sideways	Take-Profit Exit	Profitable (+1.60%) but Falling OBV with Bearish Crossover (0.98 vs 1.05 signal) signals momentum exhaustion. Excellent R/R of 1:1.54 still available, but technicals are rolling over near mid-resistance. Take profits before OBV deterioration accelerates.
PRM.BK	8.69	10.10	8.90	10.40	Rising	Bullish Territory	Bullish	Hold (Accumulate)	Strong +16.23% profit with Rising OBV and MACD in Bullish Territory (0.31 vs 0.26 signal). Poor R/R of 1:0.25 near resistance ceiling (10.10 vs 10.40) but core momentum setup? Rising volume + Bullish MACD? justifies cautious accumulation at structure support zone.
BCP.BK	37.64	44.50	34.50	46.00	Rising	Bullish Territory	Bullish	Hold	Excellent +18.21% profit with Rising OBV and MACD in Bullish Territory (2.59 vs 2.51 signal). Poor R/R of 1:0.15 pushes price near resistance (44.50 vs 46.00). Core momentum solid, but restrict new additions; maintain position to capture potential breakout if volume sustains.
KTB.BK	40.69	44.25	38.75	44.25	Falling	Bullish Crossover	Bullish	Take-Profit Exit	Profitable (+8.71%) with Bullish Crossover (1.58 vs 1.56 signal), but Falling OBV contradicts momentum sustainability. Price exactly at 1Mo Resistance ceiling (44.25 vs 44.25) with Poor R/R flag. Falling volume at resistance demands profit-taking; exit to preserve gains.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-07-31 15:24:25 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
PTT.BK	36.40	38.50	36.00	40.00	Falling	Bearish Territory	Sideways	Take-Profit Exit	Profitable (+5.76%) but Falling OBV with MACD in Bearish Territory (0.66 vs 0.76 signal) signals momentum deterioration. R/R of 1:0.60 favorable but insufficient to offset technical roll-over. Large OBV pool (1.48B) falling indicates institutional profit-taking; exit aligned with market structure.
PTTEP.BK	144.03	149.00	131.50	153.00	Falling	Bullish Territory	Bullish	Take-Profit Exit	Profitable (+3.46%) with MACD in Bullish Territory (3.04 vs 2.61 signal), but Falling OBV reveals weakening institutional accumulation. Very poor R/R of 1:0.23 with price near resistance (149.00 vs 153.00). Divergence between bullish MACD and falling volume demands profit capture.
TRUE.BK	14.00	14.50	12.80	14.60	Rising	Bullish Territory	Bullish	Hold	Modest +3.57% profit with Rising OBV and MACD in Bullish Territory (0.22 vs 0.14 signal). Extremely poor R/R of 1:0.06 near resistance ceiling (14.50 vs 14.60) limits upside. Core momentum solid; hold but avoid accumulation until price retraces or resistance breaks decisively.
WHAUP.BK	8.06	7.75	6.65	8.50	Falling	Bearish Territory	Bearish	Support-Aware Stop-Loss	Underwater -3.85% with Falling OBV and Bearish MACD (0.25 vs 0.34 signal). Price approaching 1Mo Support floor (7.75 vs 6.65 cushion). R/R of 1:0.68 insufficient to offset deteriorating technicals and loss position. Stop loss at support prevents further damage from structural breakdown.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-07-31 15:24:25 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
SCB.BK	142.63	152.50	149.50	160.00	Falling	Bearish Territory	Sideways	Take-Profit Exit	Profitable (+6.88%) but Falling OBV with Bearish MACD (1.78 vs 2.73 signal) indicates momentum exhaustion. High-Conviction Bounce R/R label insufficient given technical deterioration. Price well above 1Mo Support (152.50 vs 149.50) provides exit cushion; capture profits before OBV compression deepens.
WHA.BK	5.46	4.94	4.74	5.60	Falling	Bearish Territory	Bearish	Support-Aware Stop-Loss	Underwater -9.51% with Falling OBV and Bearish MACD (-0.05 vs 0.02 signal). Price near 1Mo Support floor (4.94 vs 4.74), but excellent R/R of 1:3.30 masks structural weakness. Falling volume and negative MACD require stop-loss discipline to prevent further capital loss from deepening bearish regime.
CPF.BK	19.42	22.40	20.30	22.70	Rising	Bearish Territory	Bullish	Hold	Profitable +15.31% with Rising OBV accumulation, but MACD remains in Bearish Territory (0.49 vs 0.57 signal). Very poor R/R of 1:0.14 with price at resistance ceiling (22.40 vs 22.70). Rising volume supports structure, but resist accumulation; hold and await MACD crossover confirmation for fresh upside.
BDMS.BK	18.47	19.30	18.70	20.10	Rising	Bearish Territory	Sideways	Hold (Accumulate)	Profitable +4.48% with Rising OBV demonstrating solid accumulation, despite Bearish MACD territory (0.04 vs 0.12 signal). Excellent R/R of 1:1.33 near support (19.30 vs 18.70) creates favorable risk geometry. Core momentum Rising volume + proximity to support justifies cautious accumulation as MACD crosses into bullish alignment.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-07-31 15:24:25 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
SCC.BK	256.43	253.00	235.00	263.00	Rising	Bearish Territory	Sideways	Hold	Underwater -1.33% but Rising OBV signals early accumulation phase despite Bearish MACD (3.37 vs 3.84 signal). Price safely above 1Mo Support (253.00 vs 235.00) with acceptable R/R of 1:0.56. Hold to monitor OBV persistence; rising volume near support may precede MACD crossover and recovery.
