SNDK	1418.17	1559.32	1861.00	1277.33	Bearish	Hold	SNDK has faced a near-term bearish correction down to 1559.32. Because the asset remains comfortably above both the 1418.17 entry cost and the primary support at 1277.33, holding to watch for signs of a reversal is recommended.
MSFT	455.37	416.67	466.32	400.01	Bearish	Buy	Trading below the entry cost of 455.37 under near-term bearish momentum. With the latest price at 416.67 trading very close to the strong monthly support level of 400.01, it is an ideal technical zone to buy and average down.
VST	150.21	148.76	168.39	132.66	Bearish	Hold	The price has drifted slightly below the entry cost of 150.21. Given that the nearest key support level of 132.66 is still a distance away, holding the position is advised rather than adding risk at this level.
