Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MU	424.62	899.00	652.21	1089.29	Falling	Bearish Territory	Bearish	Hold	Trading well above the entry cost of 424.62, providing a massive safety buffer. However, the short-term trend has turned bearish with falling OBV and a bearish MACD crossover. Risk/Reward is unfavorable (1:0.77) for adding new exposure. Hold to protect gains.
NVDA	220.80	202.86	199.34	236.54	Falling	Bearish Territory	Bearish	Hold	Currently trading below the entry cost of 220.80. Although the Risk/Reward ratio is highly favorable (1:9.57) due to proximity to the 1-Month Support of 199.34, the bearish MACD and falling OBV indicate strong downward momentum. Hold with a strict stop-loss just below support.
ORCL	183.72	204.69	178.80	250.25	Falling	Bearish Territory	Bearish	Hold	Position remains profitable relative to the 183.72 entry. However, Oracle is in a short-term pullback with falling OBV and a bearish MACD crossover. Risk/Reward of 1:1.76 is moderate. Recommendation is Hold to monitor if support at 178.80 holds.
SNDK	1418.17	1647.60	1277.33	1861.00	Rising	Bearish Territory	Bearish	Hold	Price is above the entry cost of 1418.17. OBV is rising, validating underlying accumulation, but MACD is in bearish territory and the Risk/Reward is poor (1:0.58). Hold the position, but avoid adding new capital near these levels.
MSFT	455.37	403.27	397.47	466.32	Falling	Bearish Territory	Bearish	Hold	Position is in a significant drawdown from the 455.37 entry. Price is hovering immediately above critical support at 397.47. Despite an attractive nominal Risk/Reward of 1:10.87, falling OBV and bearish MACD require defensive action. Hold with a hard stop-loss at support.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
TSM	424.30	414.02	385.06	450.16	Rising	Bearish Territory	Bearish	Hold	Trading slightly below the entry cost of 424.30. Rising OBV indicates resilient volume structure, but MACD remains in bearish territory. With a moderate 1:1.25 Risk/Reward, Hold the position and monitor support at 385.06.
LLY	971.12	1140.38	971.18	1182.73	Rising	Bullish Territory	Bullish	Hold	Position is highly profitable against the 971.12 entry. Trend is bullish with rising OBV and MACD in bullish territory. However, the stock is trading immediately underneath its 1-Month Resistance ceiling (unfavorable Risk/Reward of 1:0.25). Hold, but do not buy here.
LRCX	305.41	326.05	263.71	349.09	Rising	Bearish Territory	Sideways	Hold	Position is slightly profitable against the 305.41 entry. While OBV is rising, the short-term trend is sideways/bearish with MACD in bearish territory. A poor Risk/Reward of 1:0.37 warrants a Hold rather than initiating new buy orders.
NOW	107.68	108.92	85.44	139.20	Falling	Bearish Territory	Bearish	Hold	Trading just above the entry cost of 107.68. The stock is experiencing a downward correction with falling OBV and a bearish MACD. Hold the position to see if buyers step in before breaking below the entry cost threshold.
AMD	448.37	454.27	393.36	546.44	Falling	Bearish Territory	Bearish	Hold	Trading close to the entry cost of 448.37. AMD has faced a steep pullback with falling OBV and bearish MACD momentum. Given the moderate 1:1.51 Risk/Reward, Hold the position but protect capital as it nears the entry level.
CACI	524.53	527.74	480.38	545.29	Falling	Bullish Territory	Bullish	Hold	Slightly above the entry cost of 524.53. MACD is bullish, but the lack of volume validation (falling OBV) and a poor Risk/Reward ratio of 1:0.37 (trading near resistance) dictates a Hold. Do not buy.
