Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
ADVANC.BK	370.62	354.00	349.00	372.00	Rising	Bearish Crossover	Sideways	Hold	Position entered at 370.62 THB is currently underwater near the 372.00 THB resistance ceiling. Although OBV is rising and the theoretical R/R from the current close is 1:3.60, the MACD Bearish Crossover signals downward momentum. Hold strictly with a stop-loss just below the 349.00 THB support level.
AOT.BK	55.00	56.50	51.25	59.00	Falling	Bullish Territory	Bullish	Sell	Position entered at 55.00 THB is in profit at 56.50 THB. However, the structural Risk/Reward ratio is highly unfavorable at 1:0.48 as price trades immediately beneath the 59.00 THB resistance. Combined with falling OBV, it is recommended to Sell and lock in profits.
BBL.BK	168.45	169.00	163.00	176.00	Falling	Bearish Territory	Bearish	Sell	Entry at 168.45 THB is barely above water. Momentum is breaking down with the MACD in Bearish Territory and falling OBV validating distribution. With a mediocre R/R of 1:1.17, selling now is recommended to protect capital before support at 163.00 THB is tested.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
GULF.BK	57.92	63.00	58.50	68.50	Falling	Bullish Territory	Bullish	Hold	Position remains highly profitable from the 57.92 THB entry. Although MACD is in Bullish Territory, falling OBV suggests institutional distribution on the recent pullback. Hold the position but implement a trailing stop above the 58.50 THB support level to protect gains.
PRM.BK	8.70	8.20	7.95	9.05	Falling	Bearish Territory	Bearish	Sell	The position entered at 8.70 THB is underwater. Falling OBV and a MACD firmly in Bearish Territory confirm a strong downward trend. Sell to prevent further capital loss, as structural support at 7.95 THB is highly likely to be tested and potentially broken.
KTB.BK	32.53	34.50	32.75	35.75	Falling	Bearish Crossover	Bearish	Hold	Excellent initial entry at 32.53 THB. Current price of 34.50 THB is closer to the 35.75 THB resistance, creating a poor R/R of 1:0.71. With a MACD Bearish Crossover and falling OBV, Hold but use a tight trailing stop-loss to lock in profits.
PTT.BK	32.12	36.25	36.00	37.25	Falling	Bearish Territory	Sideways	Hold	Deep in profit from the 32.12 THB entry. The price is currently resting immediately above key support at 36.00 THB. Despite falling OBV and a bearish MACD, the tight 1:4.00 Risk/Reward ratio warrants holding with a strict trailing stop placed just below 36.00 THB.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
SCB.BK	143.38	137.50	130.50	141.50	Falling	Bullish Territory	Sideways	Sell	The entry at 143.38 THB was executed above the 1-month resistance ceiling of 141.50 THB. Even though MACD remains in Bullish Territory, the falling OBV and highly unfavorable R/R of 1:0.57 dictate a Sell to cut losses and protect remaining capital.
WHA.BK	4.87	5.00	4.44	5.20	Rising	Bearish Territory	Sideways	Hold	Position is slightly in profit from the 4.87 THB entry. Rising OBV validates underlying accumulation, offsetting the MACD Bearish Territory reading. However, because the R/R of 1:0.36 is poor near 5.20 THB resistance, Hold with a stop-loss at your cost basis.
