WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-08-06 09:50:48 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
ADVANC.BK	376.97	369.00	369.00	387.00	Falling	Bearish Territory	Bearish	Support-Aware Stop-Loss	Position unprofitable at 369.00 (below entry 376.97). Falling OBV + Bearish MACD confirm downside momentum. Although classified as 'High-Conviction Bounce', the structural breakdown below 1Mo Support (369.00) and lack of accumulation volume (OBV falling) warrant immediate stop-loss to protect capital. No structural support to hold into.
AOT.BK	61.76	63.00	60.50	65.00	Rising	Bearish Territory	Sideways	Take-Profit Exit	Position profitable (+1.24 THB, +2.0%). Rising OBV shows accumulation, but MACD remains in Bearish Territory with no crossover signal. R/R ratio of 1:0.80 is weak at Resistance (65.00). Stalled technical setup near resistance on divergent MACD justifies locking profits. Exit now to realize gains.
KBANK.BK	231.39	247.00	227.00	246.00	Rising	Bearish Territory	Bullish	Hold (Accumulate)	CRITICAL BREAKOUT EXCEPTION TRIGGERED: Latest Close (247.00) is pushing above 1Mo Resistance (246.00) with confirmed Rising OBV trend and positive volume accumulation. Although MACD is in Bearish Territory, the structural breakout with rising volume overrides normal exhaustion rules. 'Breakout (Above Resistance)' R/R classification confirms structural shift. Hold and accumulate into strength as old resistance transforms into support.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-08-06 09:50:48 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
GULF.BK	67.46	66.50	61.25	68.50	Rising	Bullish Territory	Sideways	Hold	Position unprofitable (-0.96 THB, -1.4%) but holding well above 1Mo Support (61.25) at 66.50. Rising OBV + Bullish MACD provide accumulation confirmation. Poor R/R ratio (1:0.38) and proximity to Resistance (68.50) suggest limited near-term upside, but technical setup supports hold within support zone for potential reversal bounce.
IVL.BK	23.61	21.90	21.70	25.75	Rising	Bearish Territory	Bearish	Hold	Position unprofitable (-1.71 THB, -7.2%) but stabilizing at 21.90, just above 1Mo Support (21.70). Rising OBV despite Bearish MACD crossover suggests institutional accumulation starting at floor. 'High-Conviction Bounce' R/R designation indicates strong demand-zone setup. Maintain hold to capture support-zone rebound as volume accumulation accelerates.
PTTGC.BK	36.17	37.00	33.50	41.75	Falling	Bearish Territory	Sideways	Take-Profit Exit	Position profitable (+0.83 THB, +2.3%) at 37.00. Falling OBV + Bearish MACD show momentum exhaustion. Although R/R is favorable at 1:1.36 with distance to Resistance, the combination of falling volume and technical divergence suggests profit-taking opportunity. Exit to lock gains before momentum deteriorates further.
PRM.BK	8.69	9.90	8.90	10.40	Falling	Bullish Territory	Bullish	Take-Profit Exit	Position profitable (+1.21 THB, +13.9%) at 9.90 near 1Mo Resistance (10.40). Despite Bullish MACD, Falling OBV reveals lack of follow-through accumulation volume. Poor R/R ratio of 1:0.50 at Resistance elevation indicates limited upside buffer. Secure outsized gains before volume deterioration triggers breakdown.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-08-06 09:50:48 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
BCP.BK	37.64	44.25	35.25	46.00	Rising	Bearish Territory	Bullish	Take-Profit Exit	Position highly profitable (+6.61 THB, +17.6%) at 44.25 near 1Mo Resistance (46.00). Rising OBV confirms volume support, but Bearish MACD + extremely poor R/R ratio (1:0.19) signal imminent exhaustion. Take profits now to crystallize substantial gains while technical momentum remains intact.
KTB.BK	40.69	44.75	38.75	45.00	Rising	Bullish Territory	Bullish	Hold	Position profitable (+4.06 THB, +10.0%) with Rising OBV + Bullish MACD confirming strong accumulation momentum. Latest Close (44.75) is pressing at 1Mo Resistance (45.00), signaling potential breakout. Extraordinarily high OBV (1.83B) validates institutional buying. Despite poor R/R (1:0.04) at resistance, hold to capture imminent breakout as volume trend remains powerfully bullish.
PTT.BK	36.40	38.25	36.50	40.00	Rising	Bearish Territory	Bullish	Hold	Position profitable (+1.85 THB, +5.1%) at 38.25 with Rising OBV confirming strong accumulation and balanced R/R (1:1.00). Despite Bearish MACD, the massive 1.37B OBV volume surge indicates institutional conviction. Bullish market regime supports holding. Continue to monitor for MACD crossover confirmation while accumulation volume accelerates.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-08-06 09:50:48 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
PTTEP.BK	144.03	146.50	131.50	153.00	Falling	Bullish Territory	Sideways	Take-Profit Exit	Position profitable (+2.47 THB, +1.7%) at 146.50. Despite Bullish MACD, Falling OBV divergence reveals deteriorating accumulation momentum. Poor R/R ratio (1:0.43) at current elevation with 1Mo Resistance at 153.00 provides limited upside buffer. Falling volume + poor risk/reward justify profit-taking before technical structure weakens.
TRUE.BK	14.00	13.30	12.80	14.60	Rising	Bullish Territory	Bullish	Hold	Position unprofitable (-0.70 THB, -5.0%) but benefiting from Rising OBV + Bullish MACD providing clear accumulation setup. Strong R/R ratio (1:2.60) near Support (12.80) creates favorable risk/reward for bounce. Latest Close (13.30) above support with institutional volume accumulation suggests hold into demand-zone recovery. Bullish market regime supports patience.
WHAUP.BK	8.06	7.55	6.65	8.50	Rising	Bearish Territory	Bearish	Hold	Position unprofitable (-0.51 THB, -6.3%) at 7.55 but safely above 1Mo Support (6.65). Rising OBV shows growing institutional accumulation despite Bearish MACD. Balanced R/R ratio (1:1.06) and strong support zone with rising volume justify holding for support-zone reversal. Accumulation trend contradicts bearish MACD signal.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-08-06 09:50:48 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
SCB.BK	142.63	153.50	149.50	160.00	Rising	Bearish Territory	Bullish	Hold	Position highly profitable (+10.87 THB, +7.6%) at 153.50 with Rising OBV confirming sustained accumulation. Excellent R/R ratio (1:1.62) despite proximity to Resistance (160.00) indicates room for upside expansion. Rising volume + favorable risk/reward support continued holding. Monitor MACD for bullish crossover to confirm momentum continuation.
WHA.BK	5.46	4.82	4.74	5.60	Rising	Bearish Territory	Bearish	Hold	Position unprofitable (-0.64 THB, -11.7%) at 4.82 but holding fractionally above 1Mo Support (4.74). Massive Rising OBV (1.12B) demonstrates extraordinary institutional accumulation despite Bearish MACD. 'High-Conviction Bounce' R/R classification with support-zone price action signals strong demand emergence. Hold for capitulation rebound on unmatched volume conviction.
CPF.BK	19.42	21.70	21.50	22.70	Falling	Bearish Territory	Sideways	Take-Profit Exit	Position profitable (+2.28 THB, +11.7%) at 21.70 with Falling OBV contradicting bullish price elevation. Bearish MACD + falling volume signal exhaustion despite 'High-Conviction Bounce' classification. Position is stalled at top of support zone (21.50) with limited upside to Resistance (22.70). Capture outsized gains before volume deterioration accelerates downside.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-08-06 09:50:48 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
BDMS.BK	18.47	19.60	18.70	19.90	Rising	Bearish Territory	Bullish	Take-Profit Exit	Position profitable (+1.13 THB, +6.1%) at 19.60 near 1Mo Resistance (19.90). Rising OBV confirms volume support, but Bearish MACD + extremely poor R/R ratio (1:0.33) at resistance elevation signal exhaustion. Limited upside buffer to 19.90 ceiling. Take profits now to lock gains while position remains near resistance with restricted further upside.
SCC.BK	256.43	262.00	235.00	264.00	Falling	Bullish Territory	Bullish	Take-Profit Exit	Position profitable (+5.57 THB, +2.2%) at 262.00 at 1Mo Resistance (264.00). Bullish MACD conflicts with Falling OBV showing volume divergence and momentum breakdown. Extremely poor R/R ratio (1:0.07) at resistance provides minimal upside buffer. Falling volume confirms exhaustion despite bullish MACD. Exit to realize gains before technical deterioration.
