WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-07-31 16:10:16 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
ADVANC.BK	376.97	379.00	368.00	387.00	Rising	Bearish Territory	Bullish	Take-Profit Exit	Despite a Rising OBV, the MACD is in Bearish Territory and the Risk/Reward ratio of 1:0.73 indicates a stalled position near resistance, prompting a Take-Profit Exit to lock in Thai profits.
AOT.BK	61.76	63.50	60.50	65.00	Falling	Bearish Territory	Sideways	Take-Profit Exit	A Falling OBV combined with MACD in Bearish Territory and a poor Risk/Reward ratio of 1:0.50 signals technical exhaustion, justifying a profitable Take-Profit Exit.
KBANK.BK	231.39	243.00	227.00	246.00	Rising	Bearish Territory	Bullish	Hold	The Rising OBV confirms volume accumulation despite MACD resting in Bearish Territory; given the Risk/Reward ratio of 1:0.19, maintaining a profitable Hold is warranted.
GULF.BK	67.46	66.75	61.25	68.50	Rising	Bullish Crossover	Bullish	Hold	A Rising OBV paired with a fresh Bullish Crossover MACD indicates improving momentum; with an R/R of 1:0.32, holding the losing position near support allows for a demand rebound.
IVL.BK	23.61	22.20	21.70	25.75	Falling	Bearish Territory	Bearish	Support-Aware Stop-Loss	Falling OBV and MACD in Bearish Territory alongside a structural breach below 1Mo support necessitate a Support-Aware Stop-Loss despite a High-Conviction Bounce R/R label.
PTTGC.BK	36.17	36.75	33.50	41.75	Falling	Bearish Crossover	Sideways	Take-Profit Exit	A Falling OBV and Bearish Crossover MACD reflect exhaustion, which combined with a profitable status and a 1:1.54 Risk/Reward ratio justifies a Take-Profit Exit.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-07-31 16:10:16 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
PRM.BK	8.69	10.00	8.90	10.40	Rising	Bullish Territory	Bullish	Hold (Accumulate)	Rising OBV and MACD in Bullish Territory validate strong upside momentum; paired with an attractive Risk/Reward ratio of 1:0.36, this justifies a Hold (Accumulate) stance.
BCP.BK	37.64	44.50	34.50	46.00	Rising	Bullish Territory	Bullish	Hold	A robust Rising OBV and MACD in Bullish Territory confirm strong trend continuation; given the profitable status and an R/R ratio of 1:0.15, maintaining a Hold is optimal.
KTB.BK	40.69	44.00	38.75	44.25	Falling	Bullish Crossover	Bullish	Take-Profit Exit	Despite a fresh Bullish Crossover MACD, the Falling OBV and an extremely tight R/R ratio of 1:0.05 near resistance signal limited upside, prompting a Take-Profit Exit.
PTT.BK	36.40	38.50	36.00	40.00	Falling	Bearish Territory	Sideways	Take-Profit Exit	A Falling OBV and MACD in Bearish Territory highlight waning momentum, making the profitable position with an R/R of 1:0.60 an ideal candidate for a Take-Profit Exit.
PTTEP.BK	144.03	148.50	131.50	153.00	Falling	Bullish Territory	Bullish	Hold	MACD remains firmly in Bullish Territory supporting the trend, though Falling OBV advises caution; a favorable Risk/Reward ratio of 1:0.26 justifies maintaining a profitable Hold.
TRUE.BK	14.00	14.40	12.80	14.60	Rising	Bullish Territory	Bullish	Hold (Accumulate)	Rising OBV volume accumulation combined with MACD in Bullish Territory drives this setup; the favorable Risk/Reward ratio of 1:0.13 fully justifies a Hold (Accumulate) recommendation.
WHAUP.BK	8.06	7.75	6.65	8.50	Falling	Bearish Territory	Bearish	Hold	The losing position is currently holding safely above the 1Mo support floor; despite a Falling OBV and Bearish MACD, the 1:0.68 R/R ratio supports a Hold to monitor a demand rebound.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-07-31 16:10:16 (Thailand Time) | Macro Regime: Bullish

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
SCB.BK	142.63	152.50	149.50	160.00	Falling	Bearish Territory	Sideways	Take-Profit Exit	Falling OBV and MACD in Bearish Territory indicate fading momentum; with the position in profit and labeled with a High-Conviction Bounce R/R, locking in gains via Take-Profit Exit is prudent.
WHA.BK	5.46	4.94	4.74	5.60	Falling	Bearish Territory	Bearish	Hold	Although the position is currently losing, the price is holding at the 1Mo support floor with an attractive 1:3.30 Risk/Reward ratio, allowing a Hold while monitoring for a support rebound despite a Falling OBV and Bearish MACD.
CPF.BK	19.42	22.40	20.30	22.70	Rising	Bearish Territory	Bullish	Hold	A Rising OBV confirms steady volume accumulation despite MACD sitting in Bearish Territory; the low Risk/Reward ratio of 1:0.14 and profitability justify maintaining a Hold.
BDMS.BK	18.47	19.20	18.70	20.10	Rising	Bearish Territory	Sideways	Hold	Rising OBV demonstrates ongoing accumulation even as MACD resides in Bearish Territory; with a profitable status and an R/R ratio of 1:1.80, a Hold is maintained.
SCC.BK	256.43	254.00	235.00	263.00	Rising	Bearish Territory	Sideways	Hold	While currently unprofitable, the stock's Rising OBV and a healthy Risk/Reward ratio of 1:0.47 show it is holding safely above the 1Mo support floor, warranting a Hold ahead of a potential demand-zone rebound.
