Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MU	424.62	954.51	652.21	1089.29	Falling	Bearish Crossover	Bearish	Hold	Massive cushion from the 424.62 entry remains intact. However, falling OBV and a bearish MACD crossover signal a strong short-term correction. With a poor Risk/Reward ratio of 1:0.45 underneath resistance, avoid adding positions and protect profits with a trailing stop.
NVDA	220.80	208.97	204.33	236.26	Falling	Bearish Territory	Bearish	Sell	Trading below the 220.80 entry price. Falling OBV and MACD in bearish territory indicate strong downward momentum. Despite a favorable theoretical Risk/Reward, protect capital and cut losses before support at 204.33 is broken.
ORCL	183.72	212.98	178.80	250.25	Falling	Bullish Territory	Bearish	Hold	The 183.72 entry cushion is safe, but ORCL has corrected significantly from recent highs. MACD is in bullish territory but weakening, and falling OBV confirms distribution. Hold current position but refrain from buying due to a mediocre 1:1.09 Risk/Reward.
SNDK	1418.17	1653.52	1277.33	1861.00	Falling	Bearish Territory	Bearish	Hold	Substantial profit cushion from the 1418.17 entry. Negative momentum is clear with falling OBV and MACD in bearish territory. Risk/Reward is poor at 1:0.55; maintain a hold with strict trailing stops to secure gains.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MSFT	455.37	410.32	400.01	466.32	Falling	Bearish Territory	Bearish	Sell	Position has suffered a significant drawdown from the 455.37 entry. Falling OBV and MACD in bearish territory indicate strong selling pressure. Cut losses now as the price is highly likely to test and potentially break the 400.01 support.
TSM	424.30	429.75	385.06	450.16	Falling	Bullish Territory	Bearish	Hold	Trading near the 424.30 break-even entry. Although MACD is technically in bullish territory, falling OBV indicates volume is not supporting the price. With a poor Risk/Reward of 1:0.46 near resistance, hold with a tight stop-loss to prevent entering a drawdown.
LLY	971.12	1158.62	941.64	1182.73	Rising	Bullish Territory	Bullish	Hold	Superb profits from the 971.12 entry. Price is trending up with rising OBV and bullish MACD. However, Risk/Reward is extremely poor at 1:0.11 as it trades immediately underneath resistance. Absolutely no new buys; hold and tighten trailing stops.
LRCX	305.41	328.20	263.71	346.19	Falling	Bearish Territory	Bearish	Hold	Secured above the 305.41 entry, but short-term momentum is weak as indicated by falling OBV and a bearish MACD status. Given the poor 1:0.28 Risk/Reward ratio near resistance, hold the position with tight stops and do not add.

CACI	524.53	517.30	465.00	545.29	Rising	Bullish Territory	Bullish	Hold	Slightly below the 524.53 entry but showing strong underlying technicals with rising OBV and a bullish MACD crossover. AVGO	446.13	396.69	385.59	495.00	Falling	Bearish Territory	Bearish	Sell	Significant loss from the 446.13 entry. Falling OBV and MACD in bearish territory signal strong downward momentum.
