

Daily Market Report - Watchlist Technical Summary

Generated automatically on 2026-06-07 18:30:13

Stock Name	Resistance	Support	Trend	Important Note
MU	1089.29	864.01	Bearish	A massive, high-volume rejection from the 1089.29 peak has triggered a steep near-term reversal. The stock has broken psychological levels and closed at session lows, indicating strong distribution.
NVDA	232.01	204.33	Bearish	Failed to sustain momentum above the 230 level, resulting in a breakdown below the previous consolidation range on expanding volume. Reverting to bearish control with eyes on the 204.33 support.
ORCL	250.25	209.45	Bearish	Sharp correction after peaking at 250.25. The price is currently resting near its critical immediate support of 209.45. A breach here could trigger further selling toward the 193 level.
SNDK	1861.00	1514.36	Bearish	Violent mean reversion off the 1861.00 high. The stock has wiped out over two weeks of gains in just two sessions, searching for a bottom near key support at 1514.36.
MSFT	466.32	414.40	Bearish	The stock has completed a full round-trip of its recent breakout, closing below its 10-day starting price on heavy volume. Momentum favors sellers unless 414.40 support holds.
VST	167.40	147.50	Bearish	Characterized by a steady pattern of lower highs and lower lows over the last ten sessions. A clean breakdown below the 147.50 level opens the door to deeper support levels.
TSM	450.16	412.79	Bearish	Rejection at the 450.16 psychological resistance has initiated a rapid pullback. Watch the 412.79 level closely; losing this support risks a full retest of the 402 base.
LLY	1166.29	1092.01	Bullish	Demonstrates exceptional relative strength. The stock has bucked the broader market decline, breaking out to a high of 1166.29 on increasing volume.
LRCX	346.19	302.74	Bearish	Severe institutional distribution on the final session has erased all breakout gains. The stock is testing its multi-week low support at 302.74 on heavy volume.
NOW	139.20	111.56	Bearish	The stock has aggressively retraced its exponential rise to 139.20. It is currently testing its primary breakout point around 111.56, which serves as a make-or-break level.
AMD	546.44	463.95	Bearish	A rapid collapse from the 546.44 peak on massive volume. Buyers failed to defend intermediate levels, pushing the stock back down to test critical range support at 463.95.

Daily Market Report - Watchlist Technical Summary

Generated automatically on 2026-06-07 18:30:13

Stock Name	Resistance	Support	Trend	Important Note
CACI	545.29	510.77	Bullish	Exhibiting constructive consolidation near its high of 545.29. Low-volume pullbacks demonstrate strong institutional support and a robust underlying uptrend.
AVGO	495.00	385.59	Bearish	Extremely bearish technical damage after a steep sell-off on high volume, breaking key structural levels and closing at the absolute 10-day low of 385.59.
ANET	177.48	152.19	Bearish	A total round-trip of the rally back to the 152.19-154.00 support zone. The swift, high-volume decline indicates strong overhead supply and near-term bearish momentum.
