| Ticker | Cost      | Price     | Support   | Resist.   | OBV     | MACD Status       | Trend    | Rec. | Technical Commentary                                                                                                                                                            |
|--------|-----------|-----------|-----------|-----------|---------|-------------------|----------|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| MU     | \$424.62  | \$935.89  | \$652.21  | \$1089.29 | Falling | Bearish Territory | Bearish  | HOLD | MU is experiencing a corrective pullback from recent highs, confirmed by falling OBV and a bearish MACD crossover. Support at 652.21 remains the critical long-term level.      |
| NVDA   | \$220.80  | \$208.19  | \$199.34  | \$236.26  | Falling | Bearish Territory | Bearish  | SELL | NVDA is trading below its entry cost with falling momentum and a bearish MACD. Monitor the critical support level near 199.34 to prevent further downside.                      |
| ORCL   | \$183.72  | \$205.81  | \$178.80  | \$250.25  | Falling | Bearish Crossover | Bearish  | HOLD | ORCL is undergoing a sharp retracement from its recent high of 248.15. Holding with a strict stop loss above 178.80 support is advised due to falling OBV.                      |
| SNDK   | \$1418.17 | \$1646.54 | \$1277.33 | \$1861.00 | Rising  | Bearish Territory | Sideways | HOLD | Despite a short-term pullback in price and a bearish MACD status, the rising OBV indicates sustained institutional accumulation. Maintain a hold position above the entry cost. |
| MSFT   | \$455.37  | \$403.41  | \$398.48  | \$466.32  | Falling | Bearish Territory | Bearish  | SELL | MSFT has broken significantly below its entry cost and is rapidly approaching critical support at 398.48. Bearish MACD and falling OBV confirm strong selling pressure.         |
| TSM    | \$424.30  | \$427.92  | \$385.06  | \$450.16  | Rising  | Bearish Territory | Sideways | HOLD | TSM is holding slightly above its entry cost with support at 385.06. Rising OBV shows strong underlying buying interest despite a bearish MACD signal.                          |
| LLY    | \$971.12  | \$1144.68 | \$941.64  | \$1182.73 | Rising  | Bullish Territory | Bullish  | BUY  | LLY remains in a strong bullish trend, trading well above its entry cost. MACD is in bullish territory and OBV is rising, supporting further upward movement.                   |
| LRCX   | \$305.41  | \$327.16  | \$263.71  | \$349.09  | Rising  | Bearish Territory | Sideways | HOLD | LRCX is maintaining levels above its entry cost despite a short-term bearish MACD territory warning. Rising OBV indicates solid buying interest during dips.                    |
| NOW    | \$107.68  | \$106.97  | \$85.44   | \$139.20  | Falling | Bearish Crossover | Bearish  | SELL | NOW has slipped below its entry cost under a bearish MACD crossover and falling OBV. Defensive action is warranted unless it stabilizes above support.                          |
| AMD    | \$448.37  | \$475.51  | \$393.36  | \$546.44  | Falling | Bearish Territory | Bearish  | HOLD | AMD is experiencing a correction from its recent highs but remains above entry cost. Bearish MACD and falling OBV suggest waiting for stabilization before adding exposure.     |

|--------|----------|----------|----------|----------|---------|-------------------|---------|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CACI   | \$524.53 | \$525.04 | \$465.00 | \$545.29 | Falling | Bullish Territory | Bullish | HOLD | CACI is consolidating near its entry cost with MACD in bullish territory. Falling OBV warrants caution, suggesting a holding stance until volume confirms the breakout. |
| AVGO   | \$446.13 | \$392.16 | \$370.33 | \$495.00 | Falling | Bearish Territory | Bearish | SELL | AVGO has experienced a severe correction and is trading far below its entry cost. Technical indicators remain weak, and support at 370.33 is the next critical test.    |
| ANET   | \$171.11 | \$152.16 | \$135.13 | \$177.48 | Falling | Bearish Crossover | Bearish | SELL | ANET has fallen below its entry cost after a bearish MACD crossover and negative OBV. The stock is likely to test its support level at 135.13.                          |
