| Ticker | Cost   | Price  | Support | Resist. | OBV     | MACD              | Trend    | Rec.             | Important Note (THB Context)                                                                                                                                                                             |
|--------|--------|--------|---------|---------|---------|-------------------|----------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| BH     | 190.69 | 203.00 | 180.50  | 207.00  | Rising  | Bullish Territory | Bullish  | Hold             | Position is profitable (+12.31 THB). Rising OBV combined with MACD in Bullish Territory confirms strong momentum near resistance, but poor R/R of 1:0.18 advises holding without adding new capital.     |
| GULF   | 67.25  | 63.25  | 63.25   | 68.00   | Falling | Bearish Territory | Bearish  | Hold             | Unprofitable position sitting at 1Mo Support (63.25 THB). Falling OBV and Bearish Territory MACD preclude accumulation, but testing support maintains bounce potential to justify a defensive hold.      |
| SCC    | 260.44 | 249.00 | 246.00  | 264.00  | Falling | Bearish Territory | Bearish  | Hold             | Unprofitable position testing support at 246.00 THB. Weak technical profile with Falling OBV and Bearish MACD keeps risk high, but holding support warrants maintaining position for a technical bounce. |
| TU     | 13.28  | 12.90  | 11.90   | 13.50   | Falling | Bearish Territory | Bearish  | Hold             | Unprofitable position above support (11.90 THB). Unfavorable R/R of 1:0.60 combined with Falling OBV and Bearish MACD dictates holding without averaging down until momentum shifts.                     |
| AOT    | 66.46  | 66.00  | 62.50   | 67.25   | Falling | Bullish Territory | Sideways | Take-Profit Exit | Price is capped near 1Mo Resistance (67.25 THB) with an unfavorable R/R of 1:0.36. Despite Bullish MACD, Falling OBV signal volume exhaustion at resistance, signaling an optimal exit.                  |
| BCP    | 49.61  | 51.25  | 43.00   | 51.25   | Rising  | Bearish Territory | Sideways | Take-Profit Exit | Profitable position testing resistance ceiling at 51.25 THB with Poor R/R. MACD turning into Bearish Territory overrides Rising OBV, indicating momentum exhaustion near resistance.                     |
| BDMS   | 20.01  | 19.90  | 18.80   | 20.20   | Rising  | Bullish Crossover | Bullish  | Hold             | Unprofitable position showing fresh technical improvement via a fresh Bullish Crossover and Rising OBV. Unfavorable R/R of 1:0.27 near resistance warrants holding current exposure.                     |
| KTB    | 44.54  | 44.00  | 42.50   | 46.00   | Rising  | Bearish Territory | Sideways | Hold             | Unprofitable position with an R/R of 1:1.33. Rising OBV indicates baseline institutional support, but Bearish MACD profile prevents accumulation; hold position near mid-range.                          |

| PTTEP  | -     | 150.00 | 145.00  | 152.00  | Rising  | Bearish Territory | Sideways | Hold | Watchlist asset displaying Rising OBV volume accumulation, but Bearish MACD territory and an unfavorable R/R ratio of 1:0.40 keep entry conditions unmet.                         |
| OR     | -     | 12.60  | 12.30   | 12.90   | Rising  | Bearish Territory | Sideways | Hold | Watchlist asset with Rising OBV volume. Neutral R/R of 1:1.00 combined with MACD in Bearish Territory advises waiting for clearer momentum alignment.                             |
| PTTGC  | -     | 42.25  | 36.00   | 43.00   | Rising  | Bullish Territory | Bullish  | Hold | Watchlist asset near 1Mo Resistance (43.00 THB). Strong combination of Rising OBV and Bullish MACD is constrained by a highly unfavorable R/R ratio of 1:0.12; wait for breakout. |
| KBANK  | -     | 254.00 | 238.00  | 257.00  | Rising  | Bearish Territory | Bullish  | Hold | Watchlist asset trading close to resistance (257.00 THB) with an unfavorable 1:0.19 R/R. Rising OBV shows interest, but Bearish MACD requires patience prior to entry.            |
