Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MU	424.62	939.99	652.21	1089.29	Falling	Bearish	Bearish	Hold	Substantial profit buffer remains relative to your 424.62 entry cost. However, the bearish MACD crossover and falling OBV signal momentum is shifting to the downside. Protect gains with a trailing stop.
NVDA	220.8	208.65	204.33	236.26	Falling	Bearish	Bearish	Sell	The position is currently underwater compared to your 220.80 entry. With a bearish MACD crossover and falling OBV, there is high risk of testing the key support at 204.33. Exiting is recommended to preserve capital.
ORCL	183.72	211.86	178.8	250.25	Falling	Bullish	Sideways	Hold	Trading above your 183.72 entry. The bullish MACD crossover indicates short-term momentum, but the falling OBV suggests low volume conviction on recent moves. Maintain a hold with a stop loss near entry.
SNDK	1418.17	1641.07	1277.33	1861.0	Falling	Bearish	Bearish	Hold	Well above your 1418.17 entry. However, the technical picture is deteriorating with a bearish MACD crossover and falling OBV, indicating institutional distribution. Lock in profits or use a tight trailing stop.
MSFT	455.37	412.42	400.01	466.32	Falling	Bearish	Bearish	Sell	Position is at a loss compared to your 455.37 entry. Both MACD and OBV are firmly bearish, suggesting that the price is likely to test the 400.01 support level. Exit to limit further downside.

Daily Market Report - Watchlist Technical Summary

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
VST	150.21	148.38	132.66	167.4	Falling	Bearish	Bearish	Sell	Slightly below your 150.21 entry cost. Bearish MACD and falling OBV confirm lack of buying interest, making a test of the 132.66 support more likely. Cutting losses early is advised.
TSM	424.3	430.77	385.06	450.16	Falling	Bullish	Sideways	Hold	Holding just above your 424.30 entry. A bullish MACD crossover is emerging, but the falling OBV shows divergence. Hold the position with a protective stop below 385.06.
LLY	971.12	1167.91	941.64	1173.23	Rising	Bullish	Bullish	Buy	Highly profitable relative to your 971.12 entry. The trend is strongly supported by both rising OBV (volume confirmation) and a bullish MACD crossover. Adding to the position on minor pullbacks is a viable strategy.
LRCX	305.41	319.64	263.71	346.19	Falling	Bearish	Bearish	Hold	Trading slightly above your 305.41 entry. Bearish MACD and falling OBV warn of a short-term correction. Monitor the 305.41 entry level closely as a break below it could accelerate losses.
NOW	107.68	113.61	85.44	139.2	Falling	Bullish	Sideways	Hold	Position is in green relative to your 107.68 entry. The bullish MACD crossover is positive, but falling OBV warns of distribution. Hold with a trailing stop near your entry price to lock in remaining gains.

Daily Market Report - Watchlist Technical Summary

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
AMD	448.37	485.94	393.36	546.44	Falling	Bearish	Bearish	Hold	Price is above your 448.37 entry, but a bearish MACD crossover and falling OBV indicate distribution. Hold the position, but tighten stop-loss orders around your entry point to avoid giving back gains.
CACI	524.53	529.04	465.0	545.29	Rising	Bullish	Bullish	Buy	Excellent technical setup slightly above your 524.53 entry. Both momentum (bullish MACD crossover) and volume accumulation (rising OBV) support further upside toward the 545.29 resistance level.
AVGO	446.13	396.01	385.59	495.0	Falling	Bearish	Bearish	Sell	Significantly underwater from your 446.13 entry. With both a bearish MACD crossover and falling OBV, momentum is strongly downward. Consider exiting to prevent further loss if the 385.59 support level is broken.
ANET	171.11	156.82	135.13	177.48	Falling	Bullish	Sideways	Hold	Currently trading below your 171.11 entry. The bullish MACD crossover suggests a potential short-term bounce, but the falling OBV shows weak volume support. Hold for a potential relief rally to exit closer to break-even.
