WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-12 08:38:20 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
ADVANC.BK	370.62	359.00	349.00	372.00	Rising	Bearish Territory	Sideways	Hold	Risk/Reward is 1:1.30. Despite the TDEX Bullish regime, the asset is trading below entry cost with MACD in Bearish Territory. However, Rising OBV indicates steady institutional accumulation near support, justifying a Hold.
AOT.BK	55.00	55.75	52.00	59.00	Falling	Bullish Territory	Bearish	Sell	Risk/Reward is 1:0.87. Position is profitable, but Falling OBV signals institutional exit despite the TDEX Bullish regime. Capital Preservation Rule triggers a trailing exit Sell to lock in profits.
BBL.BK	168.45	168.50	163.00	176.00	Falling	Bearish Territory	Bearish	Sell	Risk/Reward is 1:1.36. Position is barely profitable. Under the TDEX Bullish regime, Falling OBV and Bearish MACD Territory signal structural capital outflow. Downgraded to Sell to preserve capital.
GULF.BK	57.92	62.75	59.00	68.50	Falling	Bearish Crossover	Bearish	Sell	Risk/Reward is 1:1.53. Position is highly profitable, but a MACD Bearish Crossover and Falling OBV mandate a Sell to secure gains, overriding the supportive TDEX Bullish market regime.
PRM.BK	8.70	8.20	7.95	9.05	Falling	Bearish Territory	Bearish	Hold	Risk/Reward is 1:3.40. Although the TDEX Bullish regime provides systemic support, this position is currently unprofitable with Falling OBV. Do not average down; Hold to observe the 7.95 support floor.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-12 08:38:20 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
KTB.BK	32.53	34.75	33.00	35.75	Falling	Bearish Territory	Sideways	Sell	Risk/Reward is 1:0.57. Even with a supportive TDEX Bullish regime, Falling OBV on this profitable banking asset triggers our Capital Preservation Rule, requiring a Sell to secure profits.
PTT.BK	32.12	36.50	36.00	37.25	Falling	Bearish Territory	Sideways	Sell	Risk/Reward is 1:1.50. Currently profitable, but Falling OBV indicates institutional distribution. Despite the TDEX Bullish regime, we downgrade to Sell to lock in gains and protect principal.
SCB.BK	143.38	137.50	131.00	141.50	Falling	Bullish Territory	Sideways	Hold	Risk/Reward is 1:0.62. The TDEX Bullish regime and Bullish MACD prevent a panic exit. However, because the position is unprofitable and OBV is Falling, we Hold without adding exposure.
WHA.BK	4.87	4.96	4.52	5.20	Rising	Bearish Territory	Sideways	Hold	Risk/Reward is 1:0.55. Backed by a TDEX Bullish regime, this profitable position is held. Rising OBV shows solid accumulation, which counterbalances the minor Bearish MACD Territory.
