Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MU	424.62	935.89	652.21	1089.29	Falling	Bearish Crossover	Bearish	Hold	Deeply in the money relative to the 424.62 entry cost. However, a bearish MACD crossover, falling OBV, and a poor 1:0.54 Risk/Reward ratio near 1-Month Resistance of 1089.29 warrant caution. Avoid adding; protect accumulated gains with trailing stops.
NVDA	220.80	208.19	204.33	236.54	Falling	Bearish Territory	Bearish	Hold	Currently trading below the entry cost of 220.80. Although the structural Risk/Reward is highly favorable at 1:7.34 due to trading near the 204.33 support, the falling OBV and bearish MACD territory warrant caution. Hold and monitor for a volume-backed reversal before average-down actions.
ORCL	183.72	205.81	178.80	250.25	Falling	Bullish Territory	Bullish	Hold	In a favorable position relative to the 183.72 entry cost. While the MACD remains in bullish territory, a falling OBV and a pullback from recent highs around 248 signal exhaustion. The 1:1.65 Risk/Reward profile is moderate. Hold to let profits run, but watch the 178.80 support level closely.
SNDK	1418.17	1646.54	1277.33	1861.00	Falling	Bearish Territory	Bearish	Hold	Substantial profit cushion from the 1418.17 entry cost, but momentum is fading rapidly. MACD is in a bearish posture and OBV is falling, coupled with an unfavorable Risk/Reward ratio of 1:0.58. Hold but lock in profits; do not add to positions here.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MSFT	455.37	403.41	400.88	466.32	Falling	Bearish Territory	Bearish	Hold	Position is underwater relative to the 455.37 entry cost. Price is sitting immediately above the crucial 1-Month Support of 400.88, leading to a highly skewed 1:24.87 Risk/Reward. Despite the attractive R/R, falling OBV and bearish MACD dictate holding to confirm support hold before adding.
TSM	424.30	427.92	385.06	450.16	Falling	Bearish Crossover	Sideways	Hold	Price is hovering near the entry cost of 424.30. A poor Risk/Reward ratio of 1:0.52, falling OBV, and a bearish MACD crossover suggest downward pressure. Avoid adding new exposure and hold current shares with a tight stop near 385.06.
LLY	971.12	1144.68	943.26	1182.73	Rising	Bullish Territory	Bullish	Hold	Strong gains from the 971.12 entry cost, backed by rising OBV and bullish MACD momentum. However, the stock is trading immediately underneath its 1-Month Resistance of 1182.73, yielding a highly unfavorable 1:0.19 Risk/Reward. Hold but strictly avoid buying at these levels.
LRCX	305.41	327.16	263.71	346.19	Falling	Bearish Crossover	Sideways	Hold	Moderate profit relative to the 305.41 entry cost. Proximity to the 346.19 resistance results in a poor 1:0.30 Risk/Reward. Combined with falling OBV and a bearish MACD crossover, there is high correction risk. Maintain a hold and protect profits.
