Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MU	424.62	nan	652.21	1089.29	Falling	Bearish Territory	Bearish	Hold	Your entry cost of 424.62 is highly favorable, sitting far below the 1-month support of 652.21. Although the short-term trend is bearish with falling OBV and a bearish MACD crossover, the massive cushion justifies holding the position.
NVDA	220.80	nan	204.33	236.26	Rising	Bearish Territory	Bearish	Hold	Entry cost of 220.80 is positioned in the upper half of the monthly range, close to the resistance ceiling of 236.26. OBV is rising, showing positive volume divergence, but MACD remains in bearish territory. Hold with a tight mental stop near the 204.33 support.
ORCL	183.72	nan	178.80	250.25	Falling	Bullish Territory	Bullish	Hold	Excellent entry at 183.72, immediately above key support of 178.80, offering an outstanding structural Risk/Reward profile. MACD is in bullish territory, but falling OBV warns of short-term distribution. Hold to lock in gains.
SNDK	1418.17	nan	1277.33	1861.00	Falling	Bearish Territory	Bearish	Hold	The entry cost of 1418.17 is safely above the 1-month support of 1277.33. Short-term momentum has weakened as evidenced by falling OBV and a bearish MACD. Continue holding but do not add to the position.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MSFT	455.37	nan	400.01	466.32	Falling	Bearish Territory	Bearish	Sell	The entry cost of 455.37 was established immediately underneath the 1-month resistance of 466.32, resulting in a poor Risk/Reward ratio. With the price pulling back toward 411.74, a falling OBV, and bearish MACD, capital preservation dictates cutting losses before support at 400.01 is tested.
TSM	424.30	nan	385.06	450.16	Rising	Bearish Territory	Sideways	Hold	Entry cost of 424.30 sits near the middle of the monthly range. Rising OBV shows healthy accumulation, but MACD is lagging in bearish territory. Maintain a hold since the price remains above support, but avoid buying more near the 450.16 resistance.
LLY	971.12	nan	941.64	1182.73	Rising	Bullish Territory	Bullish	Hold	With an entry cost of 971.12, your position is well protected near support. While LLY's technicals are strong (rising OBV and bullish MACD), the latest trend shows the stock trading near its 1-month resistance ceiling of 1182.73. Avoid issuing a Buy due to poor near-term Risk/Reward, and Hold instead.
LRCX	305.41	nan	263.71	346.19	Falling	Bearish Territory	Bearish	Hold	Entry cost of 305.41 is currently in a neutral zone. Falling OBV and bearish MACD suggest near-term downside pressure toward the 263.71 support. Hold the position but monitor closely for signs of a deeper correction.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
NOW	107.68	nan	85.44	139.20	Rising	Bullish Territory	Bullish	Buy	With an entry cost of 107.68, the position is well-supported. The recent price pullback to 114.19 creates a favorable Risk/Reward entry far below the 139.20 resistance. Backed by rising OBV and a bullish MACD crossover, this is a technically validated buy setup.
AMD	448.37	nan	393.36	546.44	Falling	Bearish Territory	Bearish	Hold	Your entry at 448.37 is solid, sitting well above the 393.36 support level. The stock has pulled back from its 546.44 resistance ceiling on falling OBV and bearish MACD. Hold your ground and wait for momentum to stabilize.
CACI	524.53	nan	465.00	545.29	Falling	Bullish Territory	Sideways	Hold	The entry cost of 524.53 is immediately underneath the 1-month resistance ceiling of 545.29. Even though MACD is in bullish territory, the falling OBV and unfavorable Risk/Reward ratio dictate a strict 'no buy' policy here. Hold the existing position with a protective mental stop.
AVGO	446.13	nan	385.59	495.00	Falling	Bearish Territory	Bearish	Sell	Entry cost of 446.13 has been compromised. The price has collapsed toward 396.60, immediately above the critical support of 385.59. With falling OBV and a bearish MACD, the probability of a support breach is high. Protect capital and sell.

ANET	171.11	nan	135.13	177.48	Falling	Bullish Territory	Bearish	Hold	An entry cost of 171.11 placed you immediately underneath the 1-month resistance ceiling of 177.48, resulting in poor Risk/Reward. Price has since retraced to 156.40. While MACD is nominally bullish, falling OBV indicates distribution. Hold with a trailing stop to manage downside risk.
