WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-11 23:21:19 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
ADVANC.BK	370.62	359.00	349.00	372.00	Rising	Bearish Territory	Sideways	Hold	Risk/Reward ratio status is 1:1.30. TDEX Bullish regime warrants holding this underwater position to await recovery as Rising OBV confirms institutional accumulation near support.
AOT.BK	55.00	55.75	52.00	59.00	Falling	Bullish Territory	Bearish	Sell	Risk/Reward ratio status is unfavorable at 1:0.87. Despite the supportive TDEX Bullish regime, the trailing exit is triggered due to Falling OBV, prioritizing capital preservation.
BBL.BK	168.45	168.50	163.00	176.00	Falling	Bearish Territory	Bearish	Sell	Risk/Reward ratio status is 1:1.36. TDEX Bullish regime cannot offset localized institutional selling pressure indicated by the Falling OBV, triggering a defensive profit-take.
GULF.BK	57.92	62.75	59.00	68.50	Falling	Bearish Crossover	Bearish	Sell	Risk/Reward ratio status is 1:1.53. A confirmed Bearish Crossover and Falling OBV override the TDEX Bullish regime, mandating an immediate exit to secure accrued gains.
PRM.BK	8.70	8.20	7.95	9.05	Falling	Bearish Territory	Bearish	Hold	Risk/Reward ratio status is highly asymmetric at 1:3.40. Though TDEX is Bullish, Falling OBV prevents averaging down, leaving the stance at Hold near key support.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-11 23:21:19 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
KTB.BK	32.53	34.75	33.00	35.75	Falling	Bearish Territory	Bearish	Sell	Risk/Reward ratio status is weak at 1:0.57. Even within a TDEX Bullish regime, institutional exit via Falling OBV on a profitable position dictates a trailing exit.
PTT.BK	32.12	36.50	36.00	37.25	Falling	Bearish Territory	Sideways	Sell	Risk/Reward ratio status is 1:1.50. The broader TDEX Bullish regime is offset by the asset's structural breakdown in OBV, requiring a Sell to protect capital.
SCB.BK	143.38	137.50	131.00	141.50	Falling	Bullish Territory	Sideways	Hold	Risk/Reward ratio status is poor at 1:0.62. TDEX Bullish regime and Bullish Territory MACD support holding this underwater position for mean reversion despite the falling OBV.
WHA.BK	4.87	4.96	4.52	5.20	Rising	Bearish Territory	Sideways	Hold	Risk/Reward ratio status is poor at 1:0.55. However, TDEX Bullish regime and Rising OBV justify holding the profitable position as institutional accumulation remains intact.
