Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
MU	424.62	891.88	652.21	1089.29	Falling	Bearish Territory	Bearish	Hold	Position remains highly profitable against the 424.62 cost basis. However, short-term momentum has turned bearish with falling OBV and a bearish MACD crossover. The poor Risk/Reward ratio of 1:0.82 suggests avoiding adding new capital; hold to protect gains.
NVDA	220.80	200.42	199.34	236.54	Falling	Bearish Territory	Bearish	Hold	Trading below the entry cost of 220.80 and sitting immediately above the 1-Month Support of 199.34. While the R/R ratio is highly asymmetric at 1:33.44, both OBV and MACD confirm a bearish environment. Hold the position with a strict stop-loss just below 199.34.
ORCL	183.72	201.26	178.80	250.25	Falling	Bearish Territory	Bearish	Hold	The cost basis of 183.72 provides a solid buffer. ORCL is currently experiencing a correction with falling OBV and a bearish MACD crossover. Despite a constructive 1:2.18 Risk/Reward profile, hold and defer new purchases until momentum stabilizes.
SNDK	1418.17	1643.23	1277.33	1861.00	Rising	Bearish Territory	Sideways	Hold	Deeply profitable relative to the 1418.17 entry cost. While the rising OBV indicates strong underlying volume accumulation, short-term momentum is capped by a bearish MACD crossover. The poor Risk/Reward of 1:0.60 warrants a Hold recommendation over a Buy.
MSFT	455.37	397.36	397.18	466.32	Falling	Bearish Territory	Bearish	Sell	Trading well below the 455.37 entry cost and resting precariously on the 1-Month Support level of 397.18. Extreme R/R ratio aside, the falling OBV and bearish MACD indicate severe distribution. Liquidation is advised to protect capital as support is on the verge of breaking.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
TSM	424.30	408.75	385.06	450.16	Rising	Bearish Territory	Bearish	Hold	Position is currently down relative to the 424.30 entry cost. However, the rising OBV signals positive institutional accumulation during this dip. Given the bearish MACD crossover, hold the position and monitor the 385.06 support level closely.
LLY	971.12	1136.37	971.18	1182.73	Rising	Bullish Territory	Bullish	Hold	Position is highly secure against the 971.12 cost basis. Although LLY displays robust bullish MACD momentum and rising OBV, it is trading immediately beneath its 1-Month Resistance of 1182.73, making the 1:0.28 Risk/Reward extremely poor. Do not buy; hold the position.
LRCX	305.41	321.80	263.71	349.09	Falling	Bearish Territory	Bearish	Hold	Position remains above the 305.41 entry cost. LRCX is experiencing a corrective phase characterized by falling OBV and a bearish MACD crossover. Coupled with an unfavorable 1:0.47 Risk/Reward ratio, further buying should be avoided. Hold.
NOW	107.68	106.06	85.44	139.20	Falling	Bearish Territory	Bearish	Hold	Currently trading slightly below the 107.68 cost basis. While the 1:1.61 Risk/Reward ratio is technically acceptable, the combination of falling OBV and a bearish MACD signal indicates ongoing selling pressure. Hold and monitor the 85.44 support.
AMD	448.37	452.40	393.36	546.44	Falling	Bearish Territory	Bearish	Hold	Price is flirting with the 448.37 entry cost after a steep pullback. Despite a constructive 1:1.59 Risk/Reward profile, the falling OBV and bearish MACD indicate that the correction is not yet over. Hold and prepare to protect capital if the 393.36 support fails.

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note
CACI	524.53	521.14	480.38	545.29	Falling	Bullish Territory	Sideways	Hold	Currently hovering just below the 524.53 entry cost. Although MACD remains in Bullish Territory, the falling OBV and poor Risk/Reward ratio of 1:0.59 (due to the proximity of the 545.29 resistance ceiling) warrant caution. Hold the position but do not add.
AVGO	446.13	372.10	370.33	495.00	Falling	Bearish Territory	Bearish	Sell	Trading significantly below the 446.13 entry cost and sitting immediately at the 1-Month Support of 370.33. Heavy downward momentum validated by falling OBV and a bearish MACD suggests a high probability of a support breakdown. Recommend selling to preserve remaining capital.
ANET	171.11	151.76	135.37	177.48	Falling	Bearish Territory	Bearish	Hold	Price has dipped below the 171.11 entry cost. While Risk/Reward is stable at 1:1.57, the falling OBV and bearish MACD indicate that the corrective phase remains active. Hold the position and monitor the 135.37 support level closely.
