WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-11 08:37:43 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
ADVANC.BK	370.62	354.00	349.00	372.00	Rising	Bearish Crossover	Bearish	Hold	At 354.00 THB, the price is below your entry cost of 370.62 THB. While the MACD bearish crossover indicates short-term downward momentum, the rising OBV suggests accumulation on dips. With a strong Risk/Reward ratio of 1:3.60 and the price hovering just above the 1-Month Support of 349.00 THB, holding is preferred over panic selling.
AOT.BK	55.00	56.50	51.25	59.00	Falling	Bullish Territory	Bullish	Hold	Currently trading at 56.50 THB, which is profitable relative to your 55.00 THB entry. However, the Risk/Reward ratio of 1:0.48 is poor as the price approaches the 59.00 THB resistance. Combined with a falling OBV, buy volume is weakening. Hold the position but tighten stops near entry to protect profits.
BBL.BK	168.45	169.00	163.00	176.00	Falling	Bearish Territory	Bearish	Sell	Trading at 169.00 THB, virtually flat against your 168.45 THB entry. Falling OBV and a MACD in Bearish Territory signal distribution and lack of buy momentum. Given the Risk/Reward of 1:1.17 and imminent downside risk toward 163.00 THB support, exiting now to protect capital is the most prudent tactical move.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-11 08:37:43 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
GULF.BK	57.92	63.00	58.50	68.50	Falling	Bullish Territory	Bullish	Hold	Your position at 63.00 THB sits comfortably above the 57.92 THB entry cost. Despite MACD residing in Bullish Territory, the falling OBV indicates a lack of volume support on rallies. With a moderate Risk/Reward profile of 1:1.22, hold the position but monitor for signs of a deeper correction toward the 58.50 THB support.
PRM.BK	8.70	8.20	7.95	9.05	Falling	Bearish Territory	Bearish	Hold	The latest close of 8.20 THB is below your entry of 8.70 THB. Momentum is negative with MACD in Bearish Territory and falling OBV. However, because the price is resting immediately above key support at 7.95 THB, offering a favorable 1:3.40 Risk/Reward ratio, we recommend holding to see if support solidifies before executing stop-outs.
KTB.BK	32.53	34.50	32.75	35.75	Falling	Bearish Crossover	Bearish	Hold	Trading at 34.50 THB, this position remains highly profitable compared to your 32.53 THB entry. However, the Risk/Reward ratio has deteriorated to a poor 1:0.71, and MACD has completed a bearish crossover. With OBV falling, upward momentum is fading. Hold, but consider scaling out or raising stops to lock in gains.

WATCHLIST TECHNICAL SUMMARY (SET)

Generated automatically on 2026-06-11 08:37:43 (Thailand Time)

Ticker	Cost	Price	Support	Resist.	OBV	MACD	Trend	Rec.	Important Note (THB Context)
PTT.BK	32.12	36.25	36.00	37.25	Falling	Bearish Territory	Sideways	Hold	Your entry cost of 32.12 THB provides a strong safety cushion against the current close of 36.25 THB. Although MACD is in Bearish Territory and OBV is falling, the price is well-supported at the 36.00 THB level. The exceptional 1:4.00 Risk/Reward ratio warrants holding the position.
SCB.BK	143.38	137.50	130.50	141.50	Falling	Bullish Territory	Sideways	Hold	Currently trading at 137.50 THB, below your entry cost of 143.38 THB. While MACD is in Bullish Territory, the falling OBV and a weak Risk/Reward profile of 1:0.57 limit immediate upside potential. Hold for a potential rebound toward resistance at 141.50 THB, but be prepared to cut losses if support at 130.50 THB fails.
WHA.BK	4.87	5.00	4.44	5.20	Rising	Bearish Territory	Sideways	Hold	At 5.00 THB, the price is slightly above your 4.87 THB entry. Rising OBV shows healthy volume accumulation, but MACD is in Bearish Territory, and the Risk/Reward ratio is highly unfavorable at 1:0.36 due to immediate resistance at 5.20 THB. Do not add to the position; hold for a breakout.
