

Daily Market Report - Watchlist Technical Summary

Generated automatically on 2026-06-07 18:59:54

Stock Name	Resistance	Support	Trend	Important Note
MU	1089.29	864.01	Bearish	A sharp high-volume rejection at the 1089.29 peak indicates intensive institutional distribution, making 864.01 a critical support level to defend on a closing basis.
NVDA	232.01	204.33	Bearish	The stock has broken below its prior consolidation range. A clean breach of the 204.33 support level signals further technical damage toward major support zones.
ORCL	250.25	209.45	Bearish	Following a rapid mean-reversion move from the 250.25 peak, stabilizing near the key 209.45 support level is critical to prevent a complete gap fill.
SNDK	1861.00	1514.36	Bearish	A severe high-volume reversal from the 1861.00 multi-day peak has wiped out recent gains, leaving the primary trend vulnerable unless 1514.36 holds.
MSFT	466.32	414.40	Bearish	Rejection at the 466.32 peak has led to a steep retracement. A failure to hold the 414.40 key support level exposes the swing low at 409.58.
VST	167.40	147.50	Bearish	Consistently printing lower highs and lower lows. The stock is currently testing a crucial technical floor at 147.50 to avoid a long-term breakdown.
TSM	450.16	412.79	Bearish	A sharp flush to 415.17 on elevated volume of 19.59M indicates active supply, bringing the key defensive support at 412.79 into immediate focus.
LLY	1166.29	1052.15	Bullish	Demonstrating significant relative strength by bucking the broader market trend, LLY broke out to 1166.29 and remains highly bullish above the 1100.00 pivot.
LRCX	346.19	302.74	Bearish	The stock has completely erased its breakout structure on high volume. Reclaiming the 323.42 breakdown level is essential for bulls to regain control.
NOW	139.20	111.56	Bearish	Severe mean-reversion behavior from the 139.20 high. Establishing a constructive base near 111.56 is necessary to avoid a full retest of the double-digit range.
AMD	546.44	463.95	Bearish	A massive 2026-06-05 high-volume liquidation candle has completely retraced the preceding rally, making the 463.95 level a critical make-or-break zone.
CACI	545.29	510.77	Bullish	Showing robust relative strength and tight consolidation near multi-day highs. A clean breakout above 545.29 signals continuation of the uptrend.

Daily Market Report - Watchlist Technical Summary

Generated automatically on 2026-06-07 18:59:54

Stock Name	Resistance	Support	Trend	Important Note
AVGO	495.00	385.59	Bearish	An intense, high-volume liquidation phase has driven the price down to 385.73. Failure to find buyers at the 385.59 support level could trigger a capitulation phase.
ANET	177.48	152.19	Bearish	A complete round-trip has brought the stock back to its initial base at 152.19. A breakdown here threatens to invalidate the medium-term bullish structure.
